FLOW

- * Epoxy-coated flow meter.
- * No electricity needed.
- * Indicates flow and keeps a running total of the gallons pumped.
- * Note: 40 gpm is the minimum flow recorded.
- * Excellent to create 'eyes' for your irrigation system.

Flowmeters provide insight to your system and possible problems. Managing your water flow helps you to optimize the water that reaches your plants. By regularly reading your flow, you can detect problems such as leaks in a pipe.

Quality Performance, Long-Life and Reliable Flow Measuring Instruments by Netafim USA.
